*Component Packages include: All prefabricated Floor, Wall & Roof Components manufactured with KD Southern Yellow Pine Lumber and Exterior Grade 3/4" OSB or optional 3/4" Plywood. Our special steel band, all bolts & washers, nails, hardware, construction adhesive and truss plates required for erection of the structure, as well as roof fascia boards.

Exterior Western Red Cedar Siding includes: Exterior poly-urethane (PU) Wall Insulation, Galvanized Siding-Flashing, CCA Base-Trim and Trim Batten for Vertical Joints.

Roof Packages includes: Modified Bitumen Weld Roofing, plus 1 1/2" PU Insulation.

Windows: PELLA™ Designer Line Wood-Core, Aluminum-Clad, Insulated, Double-Pane, Low e-Glass, Sash color: White, Brown, Gray or Tan. Slim Shades optional.

Other Options:	One Story	Two Story
All Plywood Panels (not OSB)	\$892.-	\$1,570.-
Interior Oak Package	675.-	1,380.-

Cedar and Roofing Packages, Sky-lights, Decking and Wood Cabinetry are priced weekly and shipped per request.

All quotes are good for ten (10) business days from signing by HDC.

The cost of an Independent Erection Supervisor is included in all Component Package prices but limited to one (1) day on a One Story Model, and two (2) days on a Two Story Model. Travel Expenses for Complimentary Erection Supervision (and optional Experienced Erection Workers) are extra.

All Prices quoted are FOB our plant in Cavetown, Maryland 21720, and are subject to change without further notice. Freight charges, sales taxes, duties and any required permits are extra. Discounts are granted to customers willing to represent HDC in their area.

Delivery Time is approximately 4 to 6 weeks after receipt of order. Units are delivered by an insured independent common carrier in 65' long tractor trailer(s). It shall be the responsibility of the purchaser to provide proper direct access to the site to facilitate on-site off-loading within three (3) hours. Additional unloading time will incur additional charges by the common carrier.

Our unique Helix Structure™ is the strongest, most energy efficient and environmentally-compatible house design available, having withstood the onslaught of earthquakes in Japan, hurricanes and tornadoes in Florida, on Cape Hatteras NC, the coasts of Virginia, Maryland, Delaware, New York & Maine, and in the Caribbean,. more successfully than conventionally-built rectangular houses. Note, although the widely-used OSB is strong, we prefer to use moisture resistant Plywood and the stronger SYP framing lumber.

As it is difficult to address all construction questions, please call us during EST business hours, send an e-mail or visit us on the web.
